What would happen if we unleashed the full power of spirituality into every endeavor of business? How would it impact our organizations - - strategy, culture, customer loyalty and profitability -- every significant driver of business excellence? What would it do to our sense of purpose, our enthusiasm and our ability to lead?

Work can be a place that fully engages your heart and your soul. The beliefs and values that guide our personal life can be the same as those that guide our work. It's all ONE CIRCLE™.

Join us for a powerful conversation where you get to talk about things that are truly in your heart. Come feed the hunger you have for exploring what is important to you and for finding more meaning in your work. We will ask and answer these questions:

- What is spirituality?
- Can business really be a platform for practicing our highest beliefs?
- Can work serve a higher purpose beyond the bottom line?
- How can work be more a source of joy and satisfaction?

One Circle™ will foster your ability to be authentic at work and give you the confidence to unleash life's most powerful spiritual principles into your profession.
